**Dear reader,**

Welcome to the latest edition of the KFOR Chronicle. As I prepare to hand over the helm to my esteemed successor, OF-3 George BALFE, this edition holds special significance for me. I want to take this opportunity to extend my best wishes to him in his new role.

In this issue, we are pleased to offer a diverse array of articles highlighting the multifaceted KFOR mission. The KFOR Directorate of Staff (DOS) provides an in-depth look at its pivotal role within KFOR Headquarters, showcasing the critical functions that support our overall objectives. The Swiss Contingent shares an overview of the contributions it has made over the past 25 years, a testament to their enduring commitment to peace and security in the region.

On the ground, Regional Command West (RC-W) reflects on the recent celebrations for the 183rd Airborne Regiment's "Nembo" Day, alongside an insightful feature on the Italian paratroopers performing vital patrols along the Administrative Boundary Line (ABL).

Meanwhile, Regional Command East (RC-E) reports on the training exercises involving the M153 Common Remotely Operated Weapon Station (CROWS) software, as well as the support provided to the Kosovo Police, including a Combat Lifesaver course conducted by our dedicated medics.

We also welcome the Hungarian Air Force as a recent addition to the KFOR mission, where they will provide helicopter support for one year. This enhancement strengthens KFOR's aerial reconnaissance and transport capabilities, further solidifying our operational effectiveness. Additionally, the Multinational Specialized Unit (MSU) shares a heartwarming story about the rescue of an abandoned puppy found in critical condition near the Mitrovica Bridge, a reminder of our humanity amid our mission's challenges.

Finally, I want to express my deep gratitude to the members of the Public Affairs Office for their unwavering support over the past six months. Your dedication has been instrumental in communicating our mission's successes and challenges. Thank you for your continued dedication to KFOR. I am confident that with leaders like OF-3 George BALFE at the helm, the future of KFOR is bright.

**"Unitas Omnia Vincit" – "Unity of People wins all"**

# Regimental Day of

The 183rd Airborne Regiment “Nembo” celebrated a significant milestone on Saturday, 19 April 2025, commemorating the 80th Anniversary of the Case Grizzano Actions—a historic battle crucial to Italy’s liberation during World War II. The event also marked the annual Regimental Day, which was observed this year through dual ceremonies in Italy and Kosovo, connecting paratroopers separated by more than 1,300 kilometers.

In Italy, the celebrations took place at the Giovanni Marini Barracks in Pistoia, while abroad, paratroopers serving with the Kosovo Force (KFOR) gathered at Camp Villaggio Italia, where the Nembo Regiment leads the Regional Command West (RC-W). This dual-location event

highlighted the unbreakable bond among the regiment’s members, whether in their homeland or deployed on foreign operations.

Civilian and military authorities attended the ceremonies, underscoring their unwavering support for the regiment and its enduring legacy. The celebration provided an opportunity to reflect on the regiment’s history and strengthen the bonds between generations of paratroopers, celebrating their shared commitment to duty, sacrifice, and patriotism.

Speaking at Camp Villaggio Italia, Colonel Francesco ERRICO, Commander of the 183rd Regiment and RC-W, inspired attendees with an address that honored the regiment’s history

# the 183rd Nembo

and ongoing mission. "The history of Nembo resides in our War Flag, in the heroic actions of our decorated men, and in the daily dedication of its paratroopers. Our duty is to honor those who came before us and to protect the name and legacy of our Unit," he emphasized.

The event paid homage to the pivotal Case Grizzano battle, fought on 19 April 1945, in Casalecchio dei Conti, near Castel San Pietro Terme in the Emilia Apennine region. The 2nd Battalion of the "Nembo," fighting alongside the Combat Group "Folgore," overcame fierce resistance from the German Army's 1st Parachute Division. This victory shattered the German defensive line protecting Bologna and paved the way for Allied forces to complete Italy's liberation.

Through its annual Regimental Day celebrations, the 183rd Paratrooper Regiment continues to honour its heritage and inspire the next generation with values of courage, unity, and duty. This year's dual ceremonies symbolized the collective strength of a regiment steeped in history and committed to excellence, both at home and abroad.

# KFOR Soldiers attend CROWS

Recently, U.S. Soldiers assigned to KFOR Regional Command-East's Maneuver Battalion conducted a five-day training course focusing on the M153 Common Remotely Operated Weapon Station.

The 40-hour operator-training course gave the Soldiers the knowledge and skills necessary to operate the M153 Common Remotely Operated Weapon Station software, also known as CROWS. The CROWS system is a stabilized mount that contains a sensor suite and fire control software, and allows weapon operators to engage targets without leaving the protection of their vehicle.

U.S. Army OR-4. Phillip LUQUENO, says that attending training like the CROWS course allows his unit to gain knowledge from experienced instructors and to become proficient on systems and equipment that otherwise would not be possible if not for the KFOR mission.

"I learned how to conduct maintenance and operate the system proficiently and successfully,"

said LUQUENO. "My favourite part of the class was being able to actually get hands-on with the weapons and the system. It's the best way I learn."

The CROWS system is gunner-operated and used by the U.S. military on multiple armored vehicles and ships. During the class, the Soldiers learned how to operate the system on a High Mobility Multipurpose Wheeled Vehicle, most commonly known as a HUMVEE.

Additionally, the instructors taught the Soldiers how to use the CROWS with multiple weapon systems including the MK19 Grenade Launcher, M2 .50 Caliber Machine Gun and M240B Medium Machine Gun.

U.S. Army OR-5 Hayden MILLER, enjoyed having the opportunity to be hands-on with the MK19 and the CROWS while deployed to Kosovo.

Some of the Soldiers had prior experience with the CROWS before attending the course. However, the classroom and hands-on instruction

# S training at Camp Bondsteel

was a unique experience due to how detailed, thorough, and highly experienced the instructors were.

"My favourite part of the class was definitely the hands-on portion," said MILLER. "I very rarely get the chance to set up the MK19 on the CROWS, so learning the proper wiring configurations was one thing I learned."

The students learned that comprehensive preventive maintenance checks and services, or PMCS, are vital to proper maintenance to ensure the CROWS can be used at full potential.

The course concluded with a culminating event in which the Soldiers had to conduct PMCS to find deficiencies in the system, properly mount a weapon, and then ensure the system was working properly with the mounted weapon. Afterwards, the Soldiers' leadership was given a memorandum for record proving the participants successfully completed the 40-hour M153 CROWS operator-training course.

U.S. Army OF-2 Capt. Joseph KAUFMAN, joined his Soldiers on the last day of training and presented them with a challenge coin to show his appreciation of their efforts. He says this training during the KFOR 34 rotation is not traditionally something his Soldiers would be able to attend if they were stateside.

"Our 1st Sgt. and I take a great amount of pride in the hard work and dedication of our Soldiers," said KAUFMAN. "It is important to note that our ability to capitalize on and succeed in training opportunities such as this is directly reliant on the dedication and discipline of our Soldiers and leaders, all the while ensuring there is no sacrifice to our overall mission in Kosovo."

# Italian Paratroopers on the A

One of the main tasks carried out by KFOR soldiers is the monitoring of the Administrative Boundary Line (ABL). The Italian paratroopers of the Regional Command – West (RC-W), currently engaged in the NATO-led KFOR (Kosovo Force) mission, are part of the KFOR peacekeepers who patrol this line every day.

In the northern part of the RC-W's area of responsibility, the ABL between Serbia and Kosovo spans over 16 kilometres and reaches altitudes of more than 1,500 metres. To ensure a constant presence in this challenging area,

the Italian KFOR troops utilise Light Tactical Multirole Vehicles (LTMV) "Lince" and BV 206S tracked articulated vehicles. In the most remote areas, patrols are conducted on foot, aided by specialised snow equipment such as snowshoes and sticks.

"If you think about the landforms," explains OR-8 Giuseppe FIRMANI, an NCO tasked with a reconnaissance patrol on the ABL, "it is not the easiest recce you could undertake. Mountain activities like these require physical preparation and technical knowledge in order to achieve the goal. The equipment is heavy, and the climbs are

# Administrative Boundary Line

tough, so there's definitely some effort involved. However, training, experience and determination have allowed us to reach our target even in very difficult weather conditions."

"Patrolling these mountains," says OF2 Simone FABBRI, P-Coy Commander, "and conducting proper observations when you are on the spot requires training and technical skills. In recent months, heavy snowfall and sometimes fog have not made our job any easier, but our commitment to performing our duties to the best of our abilities has allowed us to accomplish every task."

Maintaining a continuous presence in this area ensures territorial control and upholds an appropriate security framework, in strict adherence to KFOR's mandate. This activity complements other operational patrol and surveillance duties across the 15 municipalities within the RC-W's area of responsibility, which covers approximately 8,000 square kilometres.

# KFOR RC-E Maneuver Battalion

KFOR maintain a productive and cooperative relationship with the Kosovo Police (KP), in both operational and training environments. Recently, U.S. Army Soldiers assigned to KFOR's Regional Command-East, held a Combat Lifesavers course, commonly referred to as CLS, for members of the KP. The training was a five-day event held at Camp Vrelo, Kosovo.

The Soldiers trained alongside the KP officers on all of the standard CLS skills to include basic vital assessments, chest seals, recognizing symptoms of shock, and how to properly apply a tourniquet. One of the instructors, U.S. Army OR-4 Alyssa MARTINEZ, said her favourite parts of the training

were the questions from the KP officers and the genuine interest they had in honing the skills.

"These are relatively easy skills to learn, and have been proven to mean the difference between life and death in critical situations," said MARTINEZ. "All of the people we have had the privilege to teach have come into the class with little to no prior knowledge and you can tell they value the skills they're learning and how the skills could potentially save the lives of someone."

With the assistance of a translator, the officers took part in both classroom and hands-on instruction. One of the KP officers, Arben KRYEZIU, stated

# medics provide CLS training to KP

that he learned many new skills from the Soldiers.

"It is very useful information for our daily work," said KRYEZIU. "This class is more advanced than the training we had in the past. One thing I learned that I did not know before was how to use a tourniquet."

U.S. Army OR-5 Ethan PARKE is the Medical NCOIC of the battalion and was extremely proud of his Soldiers who were the instructors during this course. "They have demonstrated a strong commitment to improving their teaching skills and tailoring lessons to the interests of the KP," said

PARKE. "Ultimately, the first person on the scene determines whether a casualty lives or dies. Since the KP are likely to be the first responders in any casualty-producing incident, their familiarity with the equipment and principles of Tactical Combat Casualty Care is crucial to enhancing Kosovo's medical response capabilities."

# 25 Years of

At the beginning of October 1999, the first SWISSCOY contingent flew into action with 160 military personnel. Since then, approximately 10,100 members of the armed forces, including 869 women, have been deployed in Kosovo as part of KFOR. The tasks have always been adapted to the needs of the mission, so that the long-term presence is characterized above all by constant change.

On 23 June 1999, the Federal Council decided to participate militarily in the Kosovo Force (KFOR) on the basis of UN Resolution 1244. The Swiss Armed Forces then recruited 160 personnel from a wide range of professions and trained them from July onwards at the military training centre in Bière. At the same time, specialists from the Fortress Guard Corps built containers to provide accommodation and offices for the SWISSCOY soldiers at Camp Casablanca near Suva Reka in Kosovo, where they were stationed together with German and Austrian contingents from October of that year. Due to the military law in force at the time, the original deployment was unarmed. The Austrian army was responsible for the protection of the Swiss unit and, together with the Germans, guarded the camp.

SWISSCOY was initially a purely logistical support unit for the Austrian KFOR battalion and provided services such as transport, fuel supply, drinking water treatment and camp maintenance. SWISSCOY's range of tasks also included the construction of important transport bridges and the renovation of roads to ensure the freedom of movement of the KFOR troops.

## Arming for self-protection as of 2002

In June 2001, the Swiss voters voted in favor of arming soldiers for self-protection in peace support operations, and the first armed SWISSCOY contingent was deployed in October 2002. An infantry company was added to take part in patrols, convoy escorts and camp security. The contingent grew to almost 220. The Swiss Air Force has also been involved in Kosovo since October 2002, providing KFOR with up to two Superpumas for the transport of people and equipment.

## New elements with LMT and EOD as of 2010

Thanks to the initial steady improvement in the security situation, KFOR gradually reduced the number of security elements and focused its forces on monitoring the country's development.

# SWISSCOY

To this end, it deployed so-called Liaison and Monitoring Teams (LMT), which significantly contribute to improve the relationships among all the communities of the area but also to foster the citizens' credibility towards KFOR. SWISSCOY has adapted to these changes and since 2010, maintains several LMTs deployed at various locations. An EOD team was also added in 2010, to remove any unexploded ordnance or mines.

## **Camp Casablanca closed in 2012**

Just two years later, the next major changes in SWISSCOY's organization took place: in 2012, the infantry company was withdrawn, allowing for greater involvement in favor of the LMT. In addition, a Swiss colonel and his staff took over the command of the Joint Regional Detachment (JRD) North at Camp Novo Selo. This command was responsible for the non-kinetic units in the North, i.e. the LMTs, and reported directly to the KFOR commander. That same year, Camp Casablanca was closed and the Swiss army personnel were transferred partly to the German army's Prizren field camp and partly to the KFOR headquarters in Pristina.

## **Reduction of the contingent from 2018**

The spring of 2018 also marked the end of the Prizren field camp, and another move was necessary - this time north to Camp Novo Selo. At the same time, the Swiss Parliament approved the first reduction of the contingent to 190 soldiers. This was due to the restructuring of KFOR, which led to the dissolution of the five JRDs. One Regional Command East and one Regional

Command West were now responsible for both kinetic and non-kinetic forces. By relinquishing command of JRD North, the necessary functions were saved. The second reduction to 165 personnel took place in October 2019.

## **New tasks from 2021**

The change continued: from spring 2021, SWISSCOY once again included an engineer platoon to close capability gaps in KFOR that had arisen due to the deterioration in the security environment. The Parliament authorized an increase to 195 SWISSCOY members for this purpose. And in spring 2024, the 50th contingent took over KFOR's operationally deployed transport company. To ensure this additional task, the contingent was increased by 20 personnel, as decided by the Federal Council on 29 November 2023. Since the spring 2024, 215 soldiers have been volunteering in Kosovo in over 100 different roles as part of military peacekeeping.

*SWISSCOY celebrated its 25th anniversary of continual engagement in late 2024, and Switzerland assumed command of the Joint Logistics Support Group (JLSG) in rotation with Austria.*

PAO SWISSCOY 51

# Directorate of Staff (DOS)

The mission of the Office of the Directorate of the Staff is to provide executive support to COS KFOR in all administrative matters pertaining to the Command Group and the Staff.

Our Directorate has been run by Hungarian Senior Officers since 2007, who manage and lead the KFOR information workflow. The Head of the Directorate organizes different sections under his office.

## **Information and Knowledge Management, Archiving**

In today's digital age, organizations like KFOR accumulate vast amounts of data and information. How we manage this asset can be the difference between success and stagnation.

Managing information is a challenge; the Directorate of Staff Office is responsible for overseeing the creation and transformation of knowledge assets such as documents, databases,

tasks, and even multimedia resources, establishing guidelines for content relevance and quality to ensure the information remains consistent and reliable. The KFOR Command Archivist organizes the records to ensure the long-term survival of KFOR documents.

"Behind this IKM ecosystem, there are sets of robust policies that contribute to the development and enforcement of correct practices, ensuring data integrity, security, and compliance with NATO's regulatory requirements. By conducting training sessions and workshops, our staff provides training on the best practices for information management, and they facilitate information sharing techniques using information management platforms (Tasker Tracker +, EDMS) that promote collective knowledge." – OF-4 Attila SEPRENYI (Director of Staff)

Organizations like KFOR continue to navigate the complexities of the information age; the role

# – The Power of Information

of Information and Knowledge Management remains vital. Their contribution not only ensures the smooth flow of information but also empowers the organizations to leverage knowledge as a strategic asset, driving greater accuracy in the decision-making process.

In November 2024, KFOR had the opportunity to host the Bi-SC IKM Conference in Camp Film City. This SHAPE-level event provided an opportunity to promote networking amongst the alliance in such a critical activity.

## **The Linguistic Service Section**

The interpreters conduct translation and all modes of interpretation: conference interpretation, simultaneous, consecutive, and simultaneous whispering, and liaising interpretation, covering the following languages: Alb-Eng/Eng-Alb, Srb-Eng/Eng-Srb. The Linguistic Services Section facilitates KFOR communication with the authorities and the population in its Area of Responsibility (AOR) to guarantee the Commander and his staff that communication is effective, reliable, and comprehensible to all parties.

## **Incoming and Outgoing Document Handling**

The NATO Secret Registry and Courier are responsible for Secret Document Management and regular mail distribution. The Registry Office is a hub for incoming and outgoing correspondences.

## **Graphics Specialist (GS)**

The Graphics Specialist creates visual formats for various purposes, such as information dissemination and advertising. They use computer software and other tools to organize pictures, text, colours, shapes, and space to effectively communicate ideas and concepts. The GS supports many activities, including Key Leader Training, Initial Theatre Training, Official Visits, National Days, Medal Parades, and Social Events.

The Directorate of Staff motto is "Verba volant, scripta manent," which represents our approach: if communication is reliable and valid, it serves as a model for future generations of KFOR.

OF-4 Attila SEPRENYI  
Director of Staff

# Stray Puppy Rescue

A heartwarming story emerges from the heart of the Balkans, where Italian Carabinieri, deployed on an international mission in Kosovo, rescued an abandoned puppy found in critical condition near the Mitrovica bridge—a symbolic site of division and longstanding tension in the region.

The rescue took place on January 4 of this year during a fixed surveillance duty at the strategically significant post, under sub-zero temperatures that would have been unbearable for any human. A special operational circumstance once again required activation at the bridge, and alongside the regular deployment, the MSU Commander at the time, Colonel Massimo ROSATI, was personally overseeing the operation, assisted by his closest collaborators.

The puppy, cold, malnourished, and visibly exhausted, was spotted wandering aimlessly

near the structure, exposed to the harsh Balkan winter. Although regulations did not account for such situations, a decision had to be made to save her from certain death. The Carabinieri did not hesitate; after recovering the puppy, they brought her to a facility near their base, where she received initial veterinary care.

In a short time, the puppy was fed, vaccinated, treated for parasites, and monitored daily. The teamwork within the MSU contingent made all the difference: everyone contributed to the puppy's well-being, including the base's civilian personnel, who helped cover the immediate veterinary expenses.

Affectionately named "ROMA" as a tribute to the Italian spirit of the initiative, the female puppy—likely a Malinois mix—quickly became the mascot of the contingent, a symbol of hope and renewal.

# I by MSU Carabinieri

From that day forward, "ROMA" became a part of the military base. With a kennel set up outside the base, she was cared for, nourished, vaccinated, and—above all—loved by the entire international MSU team.

Often, in disregard of protocol, she wandered among the uniforms as one of them, wagging her tail through the base's pathways and bringing a sense of lightness to the minds of men and women accustomed to the weight of distance and responsibility.

Instrumental to her recovery was the dedication of MSU member Marshal Mauro SANTAMARIA, one of the first to recognize the puppy's dire condition. He personally took care of her in the days following the rescue. Day by day, their bond grew stronger, evolving into something deeper. After approximately three months, following her

full recovery, "ROMA" was transported to Italy on March 17, thanks to Mauro SANTAMARIA's tireless and compassionate efforts. With all the required health and logistical authorizations in place, he accompanied her on specialized transport, bringing her to his home in Rapallo, where she joined his already large family of pets. Today, "Roma" lives happily in Rapallo with Mauro and two cats in a safe and loving environment—far from the bridge that marked the beginning of her abandonment.

This story once again underscores the human value of the KFOR military presence in Kosovo, capable of combining operational professionalism with deep compassion for all forms of life.

# A New Dimension in Operations: Hungarian Helicopter Unit Joins KFOR Air Assets

For the first time, the Hungarian Air Force helicopter element is participating in KFOR operations. The crew members of the Airbus H145M helicopter from the Hungarian Defence Forces' 86th Helicopter Wing will provide aerial support for one year, strengthening KFOR's aerial reconnaissance and transport capabilities.

The Airbus H145M is a multi-role light helicopter and one of the most modern air assets of the Hungarian Defence Forces. Its capabilities include personnel transport, aerial reconnaissance, and the ability to capture images and video footage. These helicopters are equipped with electro-optical sensors that enable targeted observation and data collection, which are essential for KFOR operations.

The collaboration between KFOR and the helicopter element aims to increase the effectiveness of operations, as data collection has, until now, been carried out using conventional manual and optical devices. With the deployment of the new electro-optical equipment to the operational area, KFOR reconnaissance specialists will gain hands-on

experience in aerial data collection.

This cooperation not only marks progress for KFOR but also sets an example for the Hungarian Defence Forces in combining modern technology with conventional military power. The continuous presence and capabilities of the helicopter element contribute to maintaining regional security and ensuring the successful execution of the international mission.

The presence of the helicopter element opens a new chapter in the Hungarian Defence Forces' mission in Kosovo. The use of aerial reconnaissance capabilities and fast, precise data collection not only enhances the effectiveness of operations but also contributes to the professional development of soldiers, in line with the requirements of modern warfare.

CALL MNMP TOC 048 100 821

Italian Liaison Monitoring Team soldiers, assigned to Regional Command East, teamed up with the Department of Blood Transfusion at the University Clinical Centre of Kosovo in Pristina for a voluntary blood donation day. This act of solidarity reflects a deep sense of humanity and strengthens the bond between KFOR and all communities across Kosovo.

Recently, COM KFOR, Major General Enrico BARDUANI, hosted a visit from the Secretary of State for the Foreign, Commonwealth and Development Office of the United Kingdom, His Excellency David LAMMY, at KFOR Headquarters in Camp Film City, Pristina. Following this, His Excellency LAMMY met with a delegation from the British Contingent in Camp Film City, to whom he expressed his appreciation for their constant commitment to Operation Joint Enterprise.

Easter eggs purchased by the Italian KFOR contingent were donated to children of different schools in Kosovo. This effort was part of regular projects conducted by KFOR in support to the local communities' needs.

Bulgarian soldiers from Regional Command West conducted live-fire exercises at the "Voloire" shooting range near Camp Villaggio Italia. The exercise aims to maintain and improve soldiers' shooting skills through individual weapon testing procedures while keeping a high level of readiness and safety.

U.S. and Latvian soldiers assigned to Regional Command East (RC-E) recently joined together for day and night sling loads operations training. Conducting this training enables KFOR troops to stay prepared to airlift vehicles and supplies via rotary-wing helicopters.

Recently, KFOR Tactical Reserve Battalion (KTRBN) conducted Combat Life Saver (CLS) training in Camp Novo Selo. This training is intended to provide an intermediate step between Basic Life Support and Advanced Life Support skills in order to assist wounded soldiers.

Croatian soldiers assigned to Regional Command West (RC-W) conducting patrols in the municipality of Prizen. Patrolling is one of the core activities of KFOR reflecting the principles of transparency and impartiality, helping to maintain stability and security in the AoO.

Recently, Italian Carabinieri and Czech soldiers from Multinational Specialized Unit (MSU) and Hungarian trainers from KFOR Tactical Reserve Battalion (KTRBN) conducted Fire-phobia training at Camp Novo Selo to maintain their high operational readiness.

# Transfer of Authority and Medal Parade

Medal Parade - Italian & Moldovan Carabinieri (MSU)

# DANCON March

Recently, the Danish contingent hosted the DANCON March, a tradition of the Danish Armed Forces that dates back to 1972 and honours the legacy of injured veterans. More than 800 soldiers from the KFOR mission joined together for the event, marching 27 kilometres while carrying at least 10 kilograms in less than 8 hours.

The DANCON March serves as a great opportunity for soldiers from multiple nations to come together and partake in a challenging yet rewarding journey while increasing readiness and improving capabilities.
